Horses in Dark Stables.

It is suggested that the sight of horses is injured by keeping the animals in dark stables, and thus when the harness is put on them, and they are suddenly brought out to the light, the pupils of the eyes are suddenly and painfully contracted, and a repetition of such treatment is very injurious. Owners of horses who would resist "meeting and venting the light and air" to themselves should not impose on their faithful horses. It is very easy to have well lighted and well ventilated stables.

## THE CIRCLE COMPLETED.

The Hostiles Completely Surrounded by Troops.

OMAHA, Jan. 5.—A special from Pine Ridge Sunday night says:

There is a circle drawn around the hostile Indians now, it being completed by the departure of Capt. Crossley, of the Seventh cavalry, with four troops for Beaver creek seven miles away. The circle is drawn to the north and east from there to Col. Henry's command, from thence to Col. Wheaton's, thence to Col. Standard's, thence to Col. Will's, thence to Col. Olney's, thence to Gen. Curtis, thence to Col. Whitney's, on the Wounded Knee battle ground, and from there back to the agency.

No Chance to Escape.

By this arrangement the Indians are practically hemmed in. At the principal railway stations along the edge of the reservation state troops are quartered. Gen. Miles said two Indians were killed at the hostile camp in a fight among themselves. The camp is nine miles away. Some wanted to surrender, but the young men refused to permit it.

A general edging in will be made this week, and there may be a final battle between the Indians and the Bad Lands.

Whitehead succeeds him in command of the regiment. Maj. Forsythe's relief is the manner in which his troops were placed in the fight.

YATES, N. Dak., Jan. 5.—Indications point to at least 1,000 Indians having left Standing Rock agency to join the hostiles.

The discovery was made on issuing rations to many that did not come to the agency and one of the "friendly" stated that they had armed themselves and gone to join the "bads" in revolt. How many have gone is only conjectured, but the indications point to at least 1,000 desertions.

Excitement at Pine Ridge.

Indians Refuse General Miles a Hearing, and Say They Want to Fight.

CHICAGO, Jan. 5.—A special to The Inter Ocean from Pine Ridge Sunday, said:

Last night was one of feverish excitement to many at the agency. For the first time the squaw men and half-breeds were alarmed, and remained up all night fearing that an attack would be made upon the reservation. The agency is too guarded to permit any large force to approach very close without discovery, but they are now being worked on by some of the numerous ravines and throwing fire arrows into barns and haystacks.

It is also said that two backs are cut, and that the agency is too guarded to permit any large force to approach very close without discovery, but they are now being worked on by some of the numerous ravines and throwing fire arrows into barns and haystacks.

How to Get Rid of Icebergs.

One of the greatest dangers to Atlantic navigation, and therefore of great practical interest to seamen, passengers and owners of ships, is the possibility of collisions with icebergs. This year these huge products of Arctic winters have been unusually common, and it is stated that more than twenty have been sighted in the course of twenty-four hours in the track of steamers plying from New York to Liverpool or the Clyde.

A correspondent in The London Times makes a suggestion that the icebergs might be used as a source of fuel, and thus broken up and dispersed. The suggestion is well received in England, and it is urged that the British meteorological department follow the example of that of the United States and mark on charts the areas within which icebergs are to be expected. The captain of a cruiser setting out with such charts in his possession would have a comparatively easy task in finding where the target floated at which he was to fire.

An English Duke.

William John Arthur Charles James Cavendish-Bentinck, sixth duke of Portland, who with his wife is about to visit America, is said to be extremely democratic and level-headed young man of 32. His simplicity and bonhomie are attributed to the fact that he was born a commoner, and until he was 29 years of age remained the inconspicuous Lieut. Cavendish, according to the title on the death of his cousin, the fifth duke. Only two other English dukes were not born to the strawberry leaves—the duke of Bedford, who was plain Mr. Russell, and the duke of Devonshire, who was Mr. Cavendish. The beautiful duchess of Portland was Miss Winifred Dallas-Yorke, only daughter of Mr. Thomas Yorke Dallas-Yorke, of Walmgate, Lincolnshire, who is said to trace his pedigree to an unbroken descent from Adam, and to look down on the whole British peerage as parvenu.—Harper's Bazar.

Rich from an Accident.

A remarkable instance of the fickleness of fortune which occurred in Butte, Mont., several weeks ago, has just come to light. Dave Evans, a young miner, had been to see his girl Sunday night. Returning home late he fell into an abandoned prospect hole, and was compelled to remain until the following morning, when, in ascending by means of a rope, he scaled off a portion of the wall and discovered a rich bed of silver. He leased the mine, and is now taking out ore that yields \$300 a ton in silver and a considerable quantity of copper. He has been offered \$50,000 to leave his mine, but refuses to sell. He will become a millionaire while the silver follows who leased to him have already become hopeless lunatics.—Cor. Chicago Times.

## NEMO IN ARIZONA.

He Tells Something About the People, the Country and the Climate.

DEAR OLD PRESS:—As I write this to your readers, the first day of the New Year, the sun is shining brightly, the air is warm and genial, and everything wears a summer aspect.

This quaint old pueblo of Tucson is said to be the oldest settlement in the United States, being almost contemporaneous with the settlement of St. Augustine, in Florida. The old Mission church of San Xavier (pronounced San Xavier) nine miles from this place, is over three hundred years old, and is still in good repair. It is built of sun dried brick, called adobe, or "dobies."

The houses in Tucson are built almost entirely of the same kind of material, there being not over a dozen real brick houses in the city, and not a frame dwelling house. The sun gets so hot here during the summer that it would be impossible to live in a frame house.

The people all sleep in cots in the open air about eight months in the year. No dew falls here during the summer, and the atmosphere is so dry and pure that out-door sleeping is the most comfortable. To show you how deceiving and rarified the air is I have only to state the San Catalina range of mountains appear to a stranger to be not over one mile from this place, and yet it is good twenty miles to the foot of them, and they are two miles high, although they look from here no higher than our Crittenden hills. That is what makes this country so valuable for invalids suffering from pulmonary complaints—its pure, dry and highly rarified air. Our city is now overrun with that class of health seekers.

There are millions of acres of the most productive land in the world now lying idle in this Territory and subject to homestead entry. Not more than a mile from this city lie thousands of acres of government land, open to entry, as rich as our Ohio river bottoms and as level as the floor, without a tree on it, just ready for the plow and seed. Any of this land can be had for the asking "without money and without price." But alas! it lacks one very essential requisite—water—to make it blossom and bring forth fruit, and without this water it now lies an unproductive, worthless desert.

By sinking wells, however, an abundance of water can be obtained at from 25 to 30 feet, and each well will water some five or six acres of ground. When you once obtain water enough to irrigate this land, it finds a ready sale all the way up from \$50 to \$500 an acre, according to location. If some one was out here with a well boring apparatus, and would enter 100 acres of government land a mile or two from Tucson, and sink wells on it, they would become wealthy inside of two years. This valley is one of the finest fruit countries in the world for oranges, figs, grapes, apricots, pomegranates, apples, pears, peaches and every other kind of fruit.

As I before stated, the land here, when properly irrigated, is almost fabulously productive. Two crops of almost anything can be raised on it during the year; and six crops of alfalfa hay are harvested every year—a crop every two months. This hay yields about three tons to the acre, and readily sells for \$12 per ton. They also raise from 75 to 100 bushels of corn to the acre, 40 to 50 bushels of wheat, and everything else in proportion. The land is filled with sea shells, marl and other rich ingredients to a depth of ten or fifteen feet, and is therefore simply inexhaustible. This whole country was once the bed of the ocean, and the land is made from these rich marine deposits.

In time this whole country will be irrigated and come under the plow, and then indeed will it be one of the wealthiest and most magnificent spots on the face of the globe. But I would not advise any of your farmers to pull up stakes and rush out here now, unless they have a few thousand dollars to make their improvements with. The man, however, who has the money to improve the land here, can make a fortune in a very few years.

Cattle raising is one of the leading industries of this Territory. The native grasses grow wild the year round, affording splendid pasture on which the cattle keep fat. Cattle are never led anything here, and all it costs to raise a three or four year old beef is what you pay the cowboy to look after the herd. And I have never eaten fatter, better, finer flavored or tenderer beef in my life than this grass fed cattle makes.

The mining interests of the Territory are now on a big boom. In fact the mountain ranges of the entire country here are rich in gold and silver. A friend of mine here, who runs a silver mine 7 miles from Tucson which has assayed \$3.75 in gold and 152 ounces in silver to the ton, offered me a half interest in the mine for \$500, as he had no money to work it. But I did not have the

## Selling Liquor.

Last week Joe and Aaron Morgan applied to county Judge Moore for a warrant charging Dr. Davis and Berry Rich with selling liquor without license, selling liquor to minors, and keeping a tippling house. During the week numerous other persons from Blackford filed complaints against the parties named. Monday the papers were placed in Sheriff Cruce's hands and he went to hunt up the parties. It seems from the statements of the people of that section that Rich is clerking for Davis, who is selling liquor as a druggist in this county near Blackford. Davis, who is a physician, gives prescriptions for liquor and Rich fills them.

## A Surprise Party.

Having comfortably settled in their new home, Fred Robertson and family were passing the evening happily and quietly Thursday; about 7 o'clock a couple of neighbors dropped in; in a few minutes another couple accidentally called; then another party happened in. This continued until about thirty had crossed the threshold, and then it dawned upon Fred and his esteemed wife that it was a surprise party. An exceedingly pleasant evening was spent. The guests were regaled with a fine luncheon, embracing the choicest dainties of the season—to say nothing of the superb wines. Good music was called into requisition and the dancing begun. A merry time was had, and when they departed the visitors proclaimed that they had been royally treated.

On Tuesday evening a number of Mr. and Mrs. Robertson older (not older, but married) friends paid them a call, each carrying a basket or bundle of eatables, and the host and hostess entertained another surprise party in the good old Kentucky style. After the banquet, they joined in the merry old games that cheered their hearts in "auld lang zion." There was Geo. Gray, blushing like a youth in his teens, as he submitted gracefully to "Old Sister Phoebe," and Dr. Swope kept time to "Weevely Wheat," as merrily as he did twenty-years ago, and Ham Loving kicking "Roxey Ann" with greater vehemence than he balances a bank book; and there were numerous others who turned the wheel of time back a quarter of a century and "cut capers" of the youth, but they have begged us to keep mum, as church discipline and the dignity of age must be respected.

Knights H. K. Woods, H. F. Ray, M. L. Hays, J. W. Blue, Jr., and R. M. Moore attend the public installation of officers of Silver Lodge K. P. at Sturgis Monday night. The occasion was one of general gathering of the clans; Henderson, Morgansfield and Uniontown lodges were well represented. After the work was done, an elegant supper was served, and such a supper defies description. It would have tickled the taste of the proudest epicurean. Silver Lodge knows how to entertain her guest.

## Union Labor Meeting.

The Union Labor committee of Crittenden county will meet at the Court house in Marion next Monday county court day, to send a delegate to the great convention of all wealth powers & laborers to be held in Cincinnati on the 23rd day of Feb. All Farmers organizations are invited to meet with us, who desire financial relief, and who endorse the alliance demands made at St. Louis in Dec 1889. We earnestly request all Union Labor men to be on hand. We pity the men who for any motive deserted our principles in the Supreme moment. Sunshine patriots deserve no honor. It is the self sacrificing hero, who does his whole duty regardless of jeers, or the plaudits of thy multitude that deserve the thanks of humanity. Every reform movement on earth has been cursed with traitors and drones. Every Union Labor man now is a patriot. He must have honest convictions, with nerves of iron, and sinews of steel. Let us on with the fight. No surrender. No barter. No betrayal. We must agitate. We must educate. The impregnable principles of our party must live, or else justice and republic will be blotted from the face of the earth. George Washington and his band of patriots, marked the snow with blood from their bare feet at Valley Forge, that a Republic might be born. The man today who is unwilling to make some personal sacrifices for good of all, deserves neither the thanks of humanity nor the blessings of God.

Mr. A. J. Picken retires from the sheriff's office with a good record behind him. He has served the county efficiently and satisfactorily for four years in an important office.

The local branch of the Building and Loan Association made its first draw from the home office last week. Mr. J. E. Brawner subscribed for ten shares of stock and borrowed \$500 to finish paying for his nice little home near the depot. The local board has been notified that another application for a loan of \$1500 has been granted. In a thriving town like Marion it is no trouble to borrow money on good real estate, at six per cent. The interest and principal is paid in monthly installments. There are numbers who could thus borrow money, buy homes, and pay for them in seven years—the time estimated for maturity of stock—and expend no more than they will for rents in the same time. The local board is composed of the following persons: R. C. Walker, Prest; H. A. Haynes, Secy; J. W. Blue, Jr., Atty; H. H. Loving, Sam Gugenheim, J. E. Brawner, and H. F. Ray. Parties who desire a full explanation of the plans, will be cheerfully informed if they will call upon the Secretary, who will also supply them with pamphlets explaining everything relative thereto in detail.

I was disappointed in getting a printer in time to issue the Monitor this week, but will be on time next week, having secured the services of Mr. Harry D. Baugh. Sorry for the delay and trust it will not happen again.

S. C. Haynes.

## The Constitutional Convention's

Legislative Committee proposes a reduction of the number of Representatives from 100 to 60; and Senators from 38 to 20. The new plan is to divide the State into ten constitutional districts. She correspondent of the Courier-Journal in discussing the arrangement of the counties should the measure be adopted says:

In the First district, composed of Fulton, Hickman, Carlisle, Ballard, McCracken, Livingston, Graves, Callaway, Marshall Trigg, Lyon, Caldwell, Union and Crittenden, the loss will be only three representatives. The peculiar position of Union county in this arrangement will probably enable it to retain its separate representative although it has only 3,199 votes, while the basis of representation in these counties is 4,556. McCracken will have to take apartner, probably Liveston, while the Mississippi river counties, Fulton Hickman, Carlisle and Ballard, would altogether make one district with 5,293 votes. Trigg might have to go in with Marshall and Lyon to make up 4,490 votes. Caldwell and Crittenden would make up 4,740, while Graves by taking in Callaway, would make the 8th district, with 4,930 votes.

## A New Railroad.

The survey of the Evansville and Chattanooga railroad was begun at Henderson yesterday under the charge of Capt. A. B. Fitch, of Terre Haute. On this subject the Courier, of Evansville, said yesterday: "There are certain indications pointing to the fact that a very deep meaning is back of this. The Courier, just here, pauses to predict that we shall see a great railroad line from Chicago to the South Atlantic and Gulf via Evansville. This line is fifty miles shorter than any other from Chicago by either Cincinnati or Louisville, and is the 'Evansville Southern.' To say nothing of the new territory opened to Evansville, the fact that we shall occupy the middle ground on the Ohio—the gateway to the New South—is enough of itself to forecast the immense importance of the enterprise to our people. It is no Utopian to see a bridge at Evansville and a transfer to Henderson in connection with it. So that one company will make up the trains and deliver them over the new bridge at Henderson and Evansville, practically making these cities one."

## In Memoriam.

Little Leslie, son of B. G. and M. E. Teer, aged 5 years and eleven months, died Dec 2, 1890. He was a bright beautiful boy, with lovely disposition and many ways, and his death is a sad blow to his fond parents, brothers and sisters. The earth's brightest gems are often gathered home while the dew of morning still sparkles upon them, and before the heat of day, and dust of toil and travel blight their beauty.
